## ABSTRACT

Robots are awesome. The word robot was introduced to the public by the Czech interwar writer Karel Čapek in his play R.U.R. (Rossum's Universal Robots), published in 1920. The play begins in a factory that uses a chemical substitute for protoplasm to manufacture living, simplified people called robots. The play does not focus in detail on the technology behind the creation of these living creatures, but in their appearance they prefigure modern ideas of androids, creatures who can be mistaken for humans. These mass-produced workers are depicted as efficient but emotionless, incapable of original thinking and indifferent to self-preservation. At issue is whether the robots are being exploited and the consequences of human dependence upon commodified labour (especially after a number of specially-formulated robots achieve self-awareness and incite robots all around the world to rise up against the humans).

# Contents

<b>1</b>	<b>Task Description</b>	<b>3</b>
<b>2</b>	<b>Motivation</b>	<b>4</b>
2.1	Problem . . . . .	4
2.2	Implementation . . . . .	4
2.3	Objectives . . . . .	4
<b>3</b>	<b>Conclusions</b>	<b>5</b>
<b>A</b>	<b>Stuff I forgot</b>	<b>6</b>

# List of Figures

1	Finite state machine diagram . . . . .	4
2	You can use \subdir in order to get the subdirectory where this file is located. This makes easier a fractal file structure. Example: content/conclusions . . . . .	5
2a	Person . . . . .	5
2b	Subfigures can be removed from the list of figures. Check packages.tex and change the options for <b>subcaption</b> . . . . .	5

# **1 Task Description**

Review of the existent space rovers. With conclusions on the end (5-10 pages, no more)

## 2 Motivation

The motivation

### 2.1 Problem

something here

### 2.2 Implementation

[Tikz Manual](#)

[Finite State Machines tutorial](#)

Figure 1: Finite state machine diagram

### 2.3 Objectives

finish

### 3 Conclusions

In conclusions, robots are the best [1].

(a) Person

(b) Subfigures can be removed from the list of figures. Check packages.tex and change the options for **subcaption**

Figure 2: You can use `\subdir` in order to get the subdirectory where this file is located. This makes easier a fractal file structure. Example: `content/conclusions`

## **A    Stuff I forgot**

Robots are really, really great.
